

RUBY USERS OF MINNESOTA SERVER COLOCATION

We know data centers.

Though we've dropped the 'Centers' from our name, Atomic Data has its roots in data center technology. When you decide to locate your email, web or various other types of servers in one of our SAS 70 certified facilities, you'll quickly understand the benefits of colocating in a state of the art industry data center with virtually limitless bandwidth and power capacities. Whether you need to simply secure your data in a redundant and offsite environment or you require advanced data replication services to a NetApp rack, Atomic Data has the colocation solution for you. Choose from one of our seven geographically redundant facilities located throughout the world.

Always have access to your data, call today! 1.800.285.5179

Atomic Data offers these specially designed and priced service tiers exclusively to the Ruby Users of Minnesota member community.

With 7 data centers worldwide, we have got you covered.
