

Ruby Users of Minnesota Server Colocation Packages

More bandwidth than you can imagine

Whatever your needs, colocation has never been easier. Place your servers where there is an overflow of bandwidth. Place your server in a secure environment. Make remote access far more effective. Back up critical applications and data. The possibilities are endless.

Protect your data by placing your server in our class A facility with:

- 24/7 physical access
- Dual power grid with In-line UPS power conditioning
- On-site diesel generator
- Hand biometrics
- 24/7 guarded and monitored facility
- Multi-homed Internet backbone to several upstream carriers.

Atomic Data Centers is offering these specially designed and priced service tiers exclusively to the Ruby Users of Minnesota member community.
